

TuffComfort® Pro Mats

Anti-Fatigue Mats • Indoor

TuffComfort Pro mats combine premium cushioning with a thick, non-porous skin for lasting comfort and durability. One-piece polyurethane construction resists moisture absorption, making Pro an ideal choice for demanding standing environments, including medical settings where moisture may be present.

- **Durable Surface** – Thick, non-porous polyurethane skin offers increased abrasion resistance and prevents moisture absorption at the surface.
- **Premium Cushioning** – High-density, PVC-free polyurethane foam provides resilient underfoot cushioning to help reduce fatigue during extended standing.
- **Easy Care** – The smooth, PVC-free polyurethane surface is easy to clean - hose off or sweep
- Features 3/4" thick, one-piece polyurethane construction with beveled edges for a gradual transition to the floor.
- Superior, non-skid bottom is certified high-traction by the National Floor Safety Institute (NFSI)
