

Educational institutions empower students to learn and grow in a positive environment. There's nothing quite like the energy you find in schools. Daily classes, sporting events, and extracurricular activities all present their own unique challenges. M+A Matting solutions are designed to help make your positive environment safer, cleaner, and more comfortable.

Entrance Matting

As much as 80% of the dirt that enters a facility is tracked in as people enter the premise according to the ISSA. Entrance matting is a vital component to maintaining a high level of appearance and reducing safety hazards and cleaning costs. This proactive measure greatly reduces visitor and occupant exposure while helping you save hundreds of dollars annually in maintenance fees. M+A offers WaterHog mats, a wide selection of outdoor scraper mats, and various carpeted (wiper) mats to place at the entrance of your building.

Logo Mats

M+A offers several different logo mat options to display school spirit and leave a lasting impression on your visitors. Logo mats are recommended for use at entryways, in auditoriums, at front desks, or anywhere you want to display your school logo, slogan, artwork, or message to teachers, students, and visitors. Photographic quality can be achieved and some styles are available in custom shapes.

Specialty Matting

Using proper matting and floor coverings is an excellent way to help reduce slips and falls in your facility. M+A is committed to safety and offers an expansive line of mats that have been certified high-traction by the National Floor Safety Institute. M+A's product line also includes mats designed for specific applications like restrooms or icy/snow covered walkways, and disposable adhesive-backed matting for short-term use.

Ergonomic Matting

Prolonged standing puts pressure on the feet, leg muscles, spine, neck, and shoulders which can lead to chronic pain, injuries, and muscular disorders. By providing educational employees with anti-fatigue mats in standing areas, or even at their desks, it can increase productivity and reduce the pain associated with standing for long periods of time. Standing on an anti-fatigue mat at your desk burns calories, reduces energy consumption, alleviates stress to the back and legs, and also reduces fatigue as a whole.

TuffComfort Standing Desk Mat

Eco-Friendly Matting

By preventing contaminants from entering a facility, mats will substantially reduce the need for cleaning chemicals that might be harmful to building occupants and the environment. M+A is committed to developing and manufacturing eco-friendly products, reusing and recycling materials as often as possible.

ColorStar®
(PET fabric features 100% recycled content reclaimed from plastics)

For more than 50 years, we've been on a mission to develop matting that makes facilities safer, cleaner, and more comfortable.
